INTRODUCTION

"Joined for Thriving: The Financial Revolution Starts Here"

In a world marked by economic uncertainty, Pool Soid Vzla emerges as an innovative response to the needings of millions of people. Our ecosystem created on the platform (ganaconsoid.com), is designed to empower communities and generate financial growth opportunities, offers a disruptive alternative to traditional financial systems.

COMPANY NAME:

“POOL SOID VZLA C.A
RIF-501935130”
REGISTERED ON FRIDAY 02/04/2022

POOL SOID VZLA

Siempre pensamos en multiplicar

we always think about multiplying

DEFINITION

Create an ecosystem in where each individual, without matter his origin nor their resources, can reach their goals financial. Through collaboration and collective investment, we can serve as a transformation for all members of our community so we can fulfill our dreams and make them come true.

GENERAL OBJECTIVE

Create an ecosystem in where each individual, without matter his origin nor their resources, can reach their goals financial. Through collaboration and collective investment, we can serve as a transformation for all members of our community so we can fulfill our dreams and make them come true.

SPECIFIC OBJECTIVES

1. Empower Communities: We create an ecosystem where people can work together, invest small amounts and earn big rewards.
2. Diversify sources of incoming: We offer multiple opportunities to generate material wealth, from investment in our Token, raffles, real estate to agricultural, educational and technological projects developed on the internet with projection into the future.
3. Boost the Digital Economy: We use Blockchain Technology and Cryptocurrencies to create a fairer and more accessible financial system.
4. Create Exciting Giveaways: Our platform offers regular drawings with attractive prizes, from cash to real estate and tangible assets.
5. Boost Smart Investments: We invest in productive projects as the agriculture and the development of real estates, generating sustainable incoming.
6. Activate Community: We foster a strong community where members collaborate and benefit each other.
7. Teach the use of Blockchain Technology: We use Blockchain Technology to ensure the transparency and security of all transactions in our Token (GCS).

THE PROBLEM

Pool Soid VZLA CA was born from the needing to aboard the economic crisis faced by many developing countries, especially in Venezuela.
This crisis manifests itself in low wages and a reduced quality of life for a large part of the population. The project identifies that the problem lies in the lack of economic opportunities and the difficulty in generating sufficient incoming to cover basic needs.

JUSTIFICATION

Pool Soid Vzla was created for delivering an innovative response to the economic crisis affecting Venezuela and other Latin American countries. By combining new technologies with traditional businesses such as education, sweepstakes, real estate investments, agriculture, Cryptocurrency investments and other businesses. The company offers a platform as a unique opportunity for people to improve their financial situation and build a prosperous future.

BASIS OF GCS:

The insufficiency of traditional financial systems: These systems do not always offer adequate solutions for the needs of vulnerable populations.
Growing interest in Cryptocurrencies: Cryptocurrencies offer an alternative to traditional financial systems and generate new investment opportunities.
The potential of blockchain technology: This technology allows the creation of transparent, secure and decentralized systems.

THE MAIN BENEFITS OF GCS ARE

Greater financial inclusion: Allows people with different income levels to participate in investments.
Income diversification: Offers multiple investment options to reduce risk.
Community Empowerment: Encourages collaboration and mutual support.
Technological innovation: Uses cutting-edge technologies to offer a safe and transparent service.

In summary, Pool Soid Vzla is a solution innovative that addresses the needs of a population that seeks alternatives to improve its economic situation. By combining elements from different sectors and using disruptive technologies, the platform offers a unique and attractive value proposition.

PROPOSAL

Pool Soid proposes to revolutionize the way we interact with the economy. Through our "Earn with Soid" movement, we promote the creation of a self-sustaining digital ecosystem where the community is the main engine. By pooling efforts and resources, our members can access a wide range of investment and income generation opportunities. Our platform, designed with cutting-edge technology, fosters collaboration and economic growth, demonstrating that together we can achieve much more.

OBJECTIVES WITH (GCS)

The main objective of GCSis to create a sustainable financial ecosystem where people can improve their quality of life through active participation.
The platform seeks to:
1. Democratize the finance: Do that the Investments and growth opportunities are accessible to everyone, regardless of income level.
2. Foster community: Build a community solid where the Members support each other and share the benefits of the project.
3. Boost economic development: Contribute to economic growth of the communities through investments in productive projects.
4. Promote Cryptocurrency adoption: Educate people about the advantages of blockchain technology and encourage the use of Cryptocurrencies.

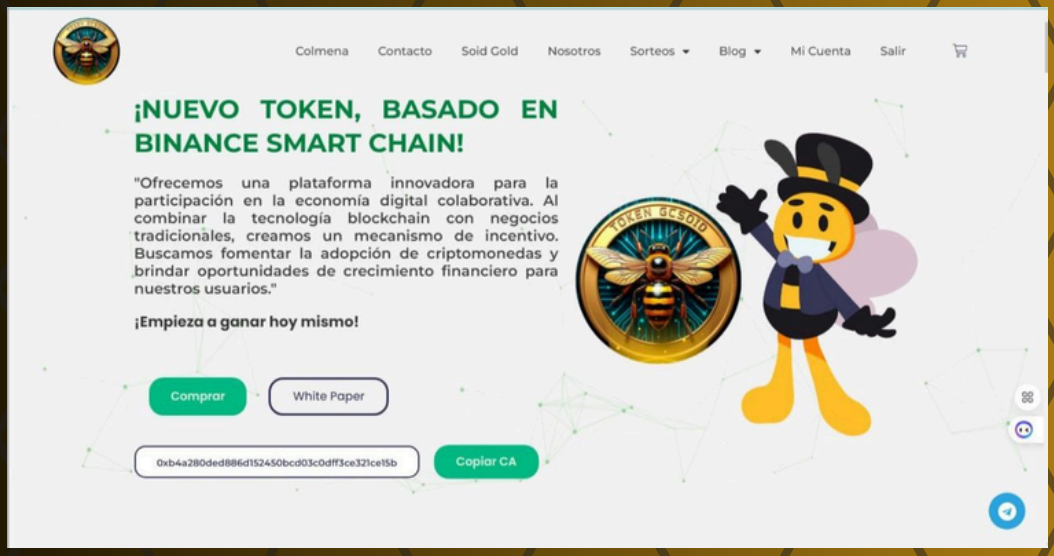
GCSPROJECT

Abridge between traditional finance and the crypto world. GCS is an innovative platform that combines elements of traditional finance with blockchain technology to offer its users multiple opportunities to generate income. Through a combination of online sweepstakes, investments in real estate, agriculture and technology projects, the platform seeks to empower communities and provide access to financial opportunities to a broader audience.

OUR PLATFORM

WEB domain:

https://ganaconsoid.com/



GCS is the platform innovative that combines elements of traditional finance with technology blockchain for offer a their users Multiple income generating opportunities.

A throughof a combination of On-Line Giveaways, technological projects, and investments in real estate, agriculture, among other businesses, the platform seeks empower the communities and toast access a financial opportunities to a broader audience.

"SOID" BRAND CREATION

The SOID bee, with his tireless labor of pollination, represents the essence of life and prosperity. Like these little insects, we work as a community to create a more abundant and sustainable world. Our "Win with Soid" initiative is inspired by the values of bees: collaboration, respect for the environment and commitment to the well-being of all. By joining our efforts, we can build a thiving ecosystem where resources are shared equitably and where each individual contributes to the common good. The Soid bee is our lighthouse, guiding us towards a future where nature and technology come together to create a better world.

FPHYSICAL PRESENTATION

DIGITAL PRESENTATION

¿HOW DOES IT WORK?

Community empowerment: Joining forces, by investing small amounts of capital among a group of people; Greater capital can be generated that then equally generates earnings for the community, allowing us to invest in larger and more profitable projects.

Diversification of income: The platform offers multiple high, medium and low risk investment opportunities, such as in cryptocurrencies, raffles, real estate, agriculture, education, among others, with a unique modality; allowing users to diversify their risks and increase their chances of profit.

Technology to the service of the people: The platform uses blockchain technology to ensure the transparency and security of all transactions through a utility token.

Giveaways as motor of growth: The Raffles generate excitement and attract new participants, which in turn increases the capital available to invest in other projects.

“THE TOKEN”

"The GCS Token marks a before and after in our SOID ecosystem, completely transforming it.
Why?
Because it is much more than just a cryptocurrency. By integrating it, we achieve:
Connect our community: Facilitating the interaction and the collaboration between all their members. Incentivize participation: Offering exclusive rewards and benefits that motivate everyone to get involved.
Boost he growth: Creating a ecosystem self-sustainable and dynamic, where all can thrive.
In short, by integrating the GCStoken into our solution, we are building a more prosperous and equitable future for our entire community."

PROPOSAL AND INTEGRATION OF THE TOKEN

FIRST PHASE OF CAPITALIZATION

The proposal to integrate the token into the platform allows us to democratize finances and gives power never before felt to the community with Blockchain Technology.

With the token our proposal focuses on:

Community Empowerment: By joining forces, members of our community can access investment opportunities that would be unattainable individually.

Income diversification: We offer multiple ways to generate income, from raffles to real estate investments and productive projects.

Transparency and security: We use blockchain technology to guarantee the transparency and security of all transactions.

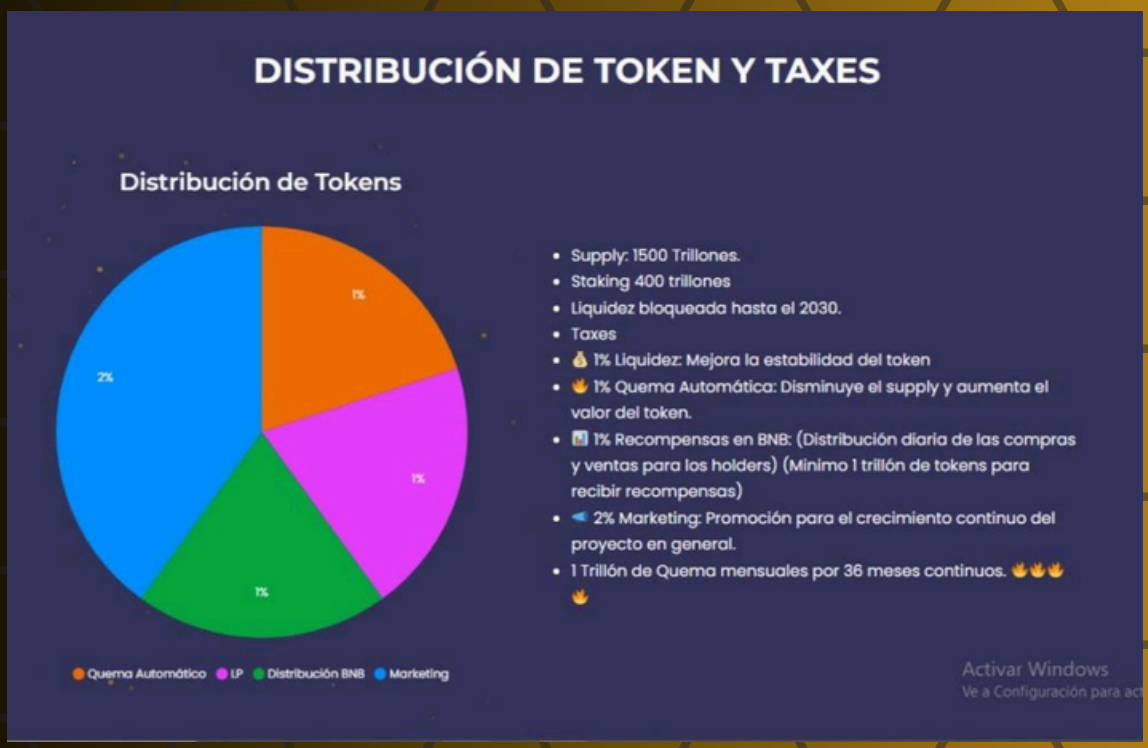
DISTRIBUTION AND TAXES

- Supply: 1.500 Trillion.
- Staking: 400 trillion Liquidity locked until 2030.
- Taxes
- 1% Liquidity: Improves token stability 1%
- Automatic Burning: Decreases supply and increases token value.
- 1% Rewards in BNB: (Daily distribution of purchases and sales for holders) (Minimum 1 trillion tokens to receive rewards)
- 2% Marketing: Promotion for the continuous growth of the project in general.
- 1 Trillion Burning monthly for 36 continuous months.



IMPORTANCE OF THE TOKEN

It incentivizes participation: By offering exclusive rewards and benefits, the token motivates users to actively participate in the community and contribute to the growth of the project.
Promotes loyalty: GCS holders become true ambassadors of the brand, promoting the project among their contacts.
Create a self-sustaining ecosystem: By generating demand for the token, a virtuous cycle is created that drives the growth of the project and benefits all participants.
Connect the community: Facilitating interaction and collaboration between members.
Encourage the stake: Offering exclusive rewards and benefits.
Driving growth: Creating a self-sustaining and dynamic ecosystem.
By integrating the GCONSOID token into our solution, we are building a more prosperous and equitable future for all members of our community.

SPECIFIC BENEFITS OF THE TOKEN

Utility: The GCS Token has multiple utilities within the ecosystem, such as a means of payment, rewards system, and governance mechanism.
Increasing value: As the project grows and becomes more widely adopted, the value of the GCS Token is expected to increase.
Access to exclusive benefits: The holders of GCS have access to a number of exclusive benefits, such as discounts, raffles and participation in making decisions.

“SWEEPSTAKES AS A LEVERAGE STRATEGY”

Our strategy of investment collective for Leveraging ourselves with raffles allows you to participate in the acquisition of high-value goods and properties. Through the purchase or sale of tickets, you can be part of a community of investors that works together to generate significant profits in common since the profits from the $9 and $10 thousand ticket draws are ultimately distributed according to the studied plan. Raffle winners can also request money if they do not wish to collect with the goods.

NOTE: all these draws of $9 and 10 thousand tickets, 50 prize places are distributed, starting from 1 to 50 in the list of winners generated by the platform.

DISTRIBUTION OF PROFITS IN THE DRAWINGS OF $9 AND 10 THOUSAND TICKETS

“Profit Distribution and Draw Dynamics. The GCS platform has designed a profit distribution model that guarantees the participation of all involved actors.

Below is the percentage breakdown of each item:

Awards: 34.6% of the total collected are directly destined to the winners of the draws.

Promoters: 22.3% is assigned to promoters as an incentive for their sales.

Sales Bonuses: An additional 5% is allocated to specific bonuses for the most prominent promoters.

Social Work: 5% of profits go to social initiatives.

Platform and Administration: 5% is reserved to cover the operating costs of the platform.

Participations: 18.1% is allocated to participations or dividends for investors.

Profit for the Token: The remaining 10% is used for the purchase and burning of GCS Tokens, which contributes to increasing its value in the market.

Note this information is explicit on the page with its respective graph.

USE OF PROFITS

Token Growth: A significant portion of the profits is reinvested in the purchase and burning of the GCS Tokens, which contributes to stabilizing and increasing its value in the long term.

Platform Development: Profits are also used to improve and expand the platform, as well as develop new functionalities.

Social Initiatives: GCS is committed to social responsibility and allocates a portion of its profits to social projects.

Important: This profit distribution may be adjusted in the future, always prioritizing the sustainable growth of the platform and the benefit of the community.

DYNAMICS OF THE DRAWINGS

Software of properly lottery: the platform has its own ticket allocation system and the winner is a 100% auditable system since it is executed by an algorithm. After the first ticket has been sold, it cannot be reconfigured, only the date can be changed.

Frequency and Structure: The giveaways take place regularly and their structure may vary depending on the number of tickets sold.

Ticket System: Each drawing has a fixed number of tickets, and the winners are selected randomly.

Ticket Value: Tickets can be purchased using various cryptocurrencies and fiat currencies.

Awards Guaranteed: In each lottery there will always be at least one winner.

Terms and Conditions: It is essential to read the terms and conditions of each giveaway, as they may vary. By participating, users authorize the use of their image for advertising purposes.

BENEFITS IN THE DRAWING

Attracting new users: Giveaways generate excitement and attract new users to the platform.
Profit distribution: The profits generated by the raffles make the projects grow exponentially and in turn the profits of all the actors, we have the goal of achieving 4 raffles per month.
GCS offers a unique proposition of value for both users and the industry. By combining the excitement of giveaways with the robustness of investments and transparency of blockchain technology, the project creates a thriving and dynamic ecosystem that benefits everyone in its community

SOID-ACADEMY: EDUCATION

In set with the education, we project our phase of capitalization in 2 to 3 years; we will solidify the bases of the ecosystem in order to move on to the next phases.

SOID-ACADEMY: CAPITALIZATION AND EDUCATION

"Education is the key that unlocks the potential of our “GCS” ecosystem.

By investing in the development of our community, we are ensuring our long-term success. Our educational projects will allow us to:

Join us as community: Working together for achieve a common goal.

Grow together: Developing the necessary skills to face the challenges of the future.

Create a positive impact: Contributing to the well-being of all.

Prepare our community: Equipping them with the necessary tools and knowledge to actively participate in the ecosystem.

Foster collaboration: Stimulating interaction and teamwork to achieve common goals.

Promote social well-being: Inspiring community members to work for the benefit of all, beyond individual interests".

“Reading, knowing and understanding our business model is the key to your success”
SOID-REFLECTION

BENEFITS FOR THE COMMUNITY

Benefits that will Transform your Life!

- Education to the Scope of All: Access to online courses and workshops (or in person) for developing your skills and knowledge in the GCS global ecosystem.
- Invest in the Future: Explore the world of the cryptocurrencies, DeFi, and blockchain for trigger long-term profits with our TOKEN (GCS).
- Trade Electronic Without Boundaries: Buys and sell our capitalization product (ONLINE DRAWS) easily and securely from anywhere.
- Earn Money Recommending: Participate in networks of marketing the marketing of affiliates for trigger additional income through the products created at https://ganaconsoid.com/.

- Fun and Entertainment: Enjoy being part of the construction of children's ecological parks style " GCS" besides of a wide variety of online games that generate profits in the token (GCS) developed by our community.
- Build your Own Digital Business: Develop applications, platforms and smart contracts for boost your ideas.
- Invest in Estate Roots: Participate in projects real estate and generates passive income.
- Cultivate Your Own Food: Support the local agriculture and consume fresh and healthy products.
- Live New Experiences: Discover unique tourist destinations and enjoy recreational activities.
- Fashion and Beauty at your fingertips: Find a wide variety of products of fashion and beauty for express your style.

MORE BENEFITS FOR USERS

1. Access to investment opportunities: GCS democratizes access to investments, allowing people with different levels of capital to participate in projects that would otherwise be inaccessible.
2. Portfolio diversification: By offering multiple investment options (sweepstakes, real estate, etc.), users can diversify their portfolio and reduce risks.
3. Rewards and benefits: GCS Token Holders get a number of benefits, such as BNB rewards, discounts on services, and access to exclusive giveaways.
4. Community Participation: Users become part of a growing community, where they can collaborate and share knowledge.
5. Transparency and security: Blockchain technology guarantees the transparency and security of all transactions.

GCS-DIGITAL
“DEFI”

""Our commitment to innovation leads us to create a complete digital ecosystem where our GCS Token will be the protagonist. We will develop SOID-SWAP, an exchange platform, and SOID-GAME, a gaming platform where users will be able to generate income and acquire our exclusive NFTs. These NFTs, based on our brand, will become valuable digital assets within our ecosystem, further strengthening the value of our GCS Token”.

GCS-DIVERSITY: ENTREPRENEURS SYSTEM

"Let's push a model of innovative business that combine ecological children parks with community commercial spaces. To the preservation of the nature and supporting local entrepreneurs, we generate a positive impact on both the environment and the community economy. "The economic benefits of this project will be distributed equitably among all active members, promoting sustainable development".

GCS-REALTOR
REAL ESTATE

"In order to ensure the future of our company and continue generating a positive impact in our community, we need to expand internationally our investments. The United States, with its solid and stable real estate market, represents an excellent opportunity to diversify our portfolio by acquiring properties in this country, we will not only strengthen our financial position, but we will also be able to reinvest a significant portion of the profits in community projects, thus demonstrating our commitment to the well-being of our members.

GCS TRADITIONAL "AGRICULTURE"

"To build a complete ecosystem that benefits all our members, we will expand our operations to the agricultural sector. GCS-AGRICULTOR will allow us to produce our own food, from fresh eggs to a variety of crops. By controlling the supply chain, we will be able to guarantee quality of products and offer competitive prices to our community. In addition, this initiative will generate new employment opportunities and strengthen our local economy.

NOTE: At this stage we already have a 25-hectare farm located in Carayaca, owned by CEO Williams Avendaño. It was put at the service of the project.
The risks are being assessed.

¿WHAT MAKES US DIFFERENT? ?

- Community Focus: We prioritize the well-being of our community over individual benefits.
- Model of business sustainable: We combine business traditional with technologies innovative.
- Transparency and security: We use the Blockchain Technology for guarantee the trusting.

BENEFITS FOR THE INDUSTRY

Promotion of the adoption of cryptocurrencies: When offering an easy-to-use platform with multiple benefits, GCS promotes the adoption of cryptocurrencies among a broader audience.

Innovation in the financial sector: The combination of raffles, investments and blockchain technology creates an innovative business model that can inspire other projects.

Impact social positive: When supporting communities projects and generating employment opportunities, GCS contributes to economic and social development.

Growth of the ecosystem blockchain: The popularity of GCS Token can boost the growth of the Binance Smart Chain ecosystem and attract new developers and investors.

LONG TERM VISION

Becoming a Decentralized Financial Ecosystem, leader in Latin America, empowering to the communities and offering economic growth opportunities through innovation and Blockchain Technology.

The vision of GCS transcends the simple creation of an investment project. We aspire to build a prosperous and sustainable ecosystem that benefits all its participants. Our ambition is becoming a benchmark in the region, demonstrating that Blockchain Technology can be a powerful tool to improve people's quality of life.

7 PILLARS OF OUR VISION

1. Solid Capitalization: Consolidate the project through a long-term capitalization strategy, based on investor retention and the organic growth of the community.
2. Revenue Diversification: Expand our operations beyond sweepstakes, exploring sectors such as real estate, agriculture, education and entertainment.
3. Development Technological: Keeping ourselves at the vanguard of the Blockchain Technology, implementing new solutions and constantly improving our platform.
4. Social Impact: Contribute to the development of communities through investments in social and educational projects.
5. International Growth: Expand our presence in new markets, taking advantage of the opportunities offered by globalization.
6. Decentralized Governance: Implement a governance system that allows GCS Token Holders to participate in important project decisions.
7. Sustainability: Build a long-term sustainable business, generating value for all stakeholders.

¿HOW WILL WE ACHIEVE THIS VISION?

1. Encouraging the innovation: We will continue exploring new business opportunities and emerging technologies.
2. Building a Strong Community: We will encourage participation and engagement in our community through events, contests and incentive programs.
3. Establishing Strategic Alliances: We will collaborate with other companies and organizations to expand our network and strengthen our position in the market.
4. Investing in talent: We will attract the best professionals to join our team and contribute to the success of the project.

COMMITMENT TO INNOVATION AND THE FUTURE

GCS is more than a financial project. It is a vision of the future where technology is used to empower people and build a more just and equitable world.
We are committed to:

Being pioneers: Always being at the forefront of innovation, looking for new ways to create value for our users.
Be transparent: Ensure transparency in all our operations and maintain open communication with our community.
Be responsible: Act responsibly and ethically, respecting the environment and the communities in which we operate.

In summary, our vision is building a decentralized, sustainable and prosperous Financial Ecosystem that benefits all its participants. Through innovation, collaboration and engagement, we are transforming the way people interact with money and creating a brighter future for everyone.

ANALYSIS OF THE COMPETITION

1. Cryptocurrency investment platforms:

• Exchanges centralized: Platforms as Binance, Coinbase and Kraken offer a wide range of cryptocurrencies to buy, sell and exchange. However, its main focus is trading and not necessarily long-term investment or participation in communities.

• Staking Platforms: Platforms that allow users to earn rewards by locking up their cryptocurrencies. While they offer a way to generate passive income, they do not typically combine this feature with sweepstakes or real estate investments.

• Projects DeFi (Decentralized Finances): Platforms like Uniswap, Aave, and Compound offer decentralized financial services such as token swaps and lending. Although they share some aspects with Pool Soid Vzla, their approach is more technical and less community oriented.

ANALYSIS OF THE COMPETITION

2. Online raffle and lottery platforms: National lotteries: Traditional lotteries offer raffles with cash prizes, but they tend to have a more rigid and less flexible structure than digital platforms. Online sweepstakes platforms: There are numerous platforms that offer online sweepstakes, but few combine this activity with investments in cryptocurrencies and real estate.

3. Crowdfunding platforms: Traditional Crowdfunding Platforms like Kickstarter and Indiegogo allow people and companies to raise funds for specific projects. However, they tend to focus on creative projects and not necessarily financial investments.

4. Blockchain-based community projects: DAOs (Decentralized Autonomous Organizations): Some DAOs focus on collective investment and decentralized governance. However, they tend to have a more technical and less end-user-oriented approach.

Identifying the Differentiation of GCS

Despite the existence of these platforms, Pool Soid Vzla presents a unique value proposition that differentiates it from its competitors:

Combination of sweepstakes, investments and cryptocurrencies: No other platform offers such a complete combination of these elements, allowing users diversify their investments and increase their chances of winning.

Community Focus: The platform focuses on building a strong and supportive community, where members benefit from each other.

Accessibility: Pool Soid Vzla seeks to make investments accessible to everyone, regardless of their income level or financial knowledge.

Social impact: The platform aims to generate a positive impact on communities, supporting social and educational projects. Pool Soid Vzla occupies a unique market niche by combining elements from different sectors (decentralized finance, gaming, real estate, investments) and by focusing on the needs of a specific community. However, it is important to recognize that there are competitors who could pose a threat in the future.

CONCLUSIONS

Conclusion GCS is an ambitious project that seeks to transform the way people interact with money.
By combining the best of both worlds, traditional and digital, the platform offers a unique and attractive value proposition for those seeking to improve their financial situation. GCS offers an alternative to traditional financial systems, putting power in the hands of communities and enabling people to build a more prosperous future. By combining the strength of the community with the opportunities provided by technology, the project seeks to generate a positive impact on the lives of its participants.
In few words, GCS is a community that seeks solve issues economical through the collaboration, the innovation and technology.

“Thank you for the great support”

We do not show the list of ABSENTS out of respect, but this teaches us that projects have their time and in as we clear the land, we realize those who are willing to sow and then reap.

“Thanks to those people who somehow helped us. They supported us at some point along the way.”

"Join the financial revolution and build your future with us!

Pool Soid Vzla provides the tools and the support that you need to achieve your financial goals.

With Pool Soid Vzla, you will have access to unique opportunities and the possibility of generating passive incomings.

Don't be left out!"
